Subject Index of Volume B12

Acetylcholine
development of microbiosensor for determination of choline and, 37
Air–fuel ratio
proportional, zirconia oxygen sensor, 83
Avidin–biotin interaction
enzyme-modified Langmuir–Blodgett membranes in glucose electrodes based on, 153

Biochemical measurements
polarimetric optical-fibre sensor for, 205
Bismuth
vacancy donors and electrical properties of Bi Fe molybdate pellets, 95
Butane
methane and, concentrations in mixture with air determined by microcalorimetric sensors and neutral networks, 147

Carbon monoxide
mechanism of interaction between CO and SnO_2 surface; role of water vapour, 71
Carrier catalytic methane sensor
planar type of, 19
Chemical response
temperature effect and, of SAW single-delay-line chemosensors, 115
Chemical sensor
fiber-optic, based on surface plasmon resonance, 213
Chemosensors
temperature effects and chemical response of SAW single-delay-line, 115
Choline
development of microbiosensor for determination of, and acetylcholine, 37
Cluster analysis
transformed; approach to identification of gases/odours using integrated gas-sensor array, 103
Combustible gas detector
colorimetric, employing Pt film heaters, 91
Copper
fabrication of thin-film CuO/ZnO heterojunction and its humidity-sensing properties, 135

Electrical properties
vacancy donors and, of Bi Fe molybdate pellets, 95
Environmental test chamber
gas injector for automatic, for characterization of gas sensors, 141
Explosion conditions
behaviour of catalytic methanometers in simulated, 181

Fermentation control
using ATR and FT-IR spectrometer, 57
Fermenter
microbial sensor for on-line determination of microbial population in, 45
Ferrocene
amperometric determination of glucose with ferrocene-mediated glucose oxidase electrode, 33
FETs
simulation of lateral electrical field for analysis of threshold voltage instabilities of SGFETs, 231
Fiber-optic chemical sensor
based on surface plasmon resonance, 213
Fiber-optic sensor
based on surface plasmon interrogation, 221
Fluorescence
lifetime energy-transfer immunoassay quantified by phase-modulation fluorometry, 65
Fluorometry
fluorescence lifetime energy-transfer immunoassay quantified by phase-modulation, 65
Force-field calculations
tetraazacyclophanes as host molecules for solvent vapours; mass-sensitive detection and, 169

Gas detector
calorimetric combustible, employing Pt film heaters, 91
Gases
transformed cluster analysis; approach to identification of, using integrated gas-sensor array, 103
Gas injector
for automatic environmental test chamber for characterization of gas sensors, 141
Gas sensing
using Langmuir–Blodgett films of Ru porphyrin, 111
Gas-sensing properties
of ultramicro $ZnSnO_2$ powder, 5
Gas-sensitive characteristics
of polyaniline material, research into normal temperature, 11
Gas-sensor array
transformed cluster analysis; approach to identification of gases/odours using integrated, 103
Gas sensors
gas injector for automatic environmental test chamber for characterization of, 141
with integrated metal-oxide semiconductor structure, 1
Glucose
amperometric determination of, with ferrocene-mediated glucose oxidase electrode, 33
Glucose electrodes
enzyme-modified Langmuir–Blodgett membranes in, based on avidin–biotin interaction, 153
Glucose oxidase electrode
amperometric determination of glucose with ferrocene-mediated, 33

Hepatitis B
surface antigen, novel immunoelectrode assay for, 49
Host molecules
tetraazacyclophanes as, for solvent vapours; mass-sensitive detection and force-field calculations, 169

Humidity-sensing properties
fabrication of thin-film CuO/ZnO heterojunction and its, 135
Humidity sensor
SAW, with high resolution, 53
Hydrogen
effect of total hydrogen content in Si nitride sensitive film on performance of ISFET, 23
effect of water on hydrogen-sensitive W oxide films, 161

Immunoassay
fluorescence lifetime energy-transfer, quantified by phase-modulation fluorometry, 65
Immunoelectrode assay
for hepatitis B surface antigen, novel, 49
Iridium
Ir oxide-based microelectrochemical transistors for pH sensing, 225
Iron
vacancy donors and electrical properties of Bi Fe molybate pellets, 95
ISFET
effect of total hydrogen content in Si nitride sensitive film on performance of, 23

Kelvin microprobe
temperature-controlled, 175

Langmuir–Blodgett films
of Ru porphyrin, gas sensing using, 111
Languir–Blodgett membranes
enzyme-modified, in glucose electrodes based on avidin–biotin interaction, 153
Lipid membrane
novel odour sensor coated with, 15

Metal-oxide semiconductor structure
investigations of gas sensor with integrated, 1
Methane
and butane concentrations in mixture with air determined by microcalorimetric sensors and neutral networks, 147
Methane sensor
planar type of carrier catalytic, 19
Methanometers
behaviour of catalytic, in simulated explosion conditions, 181
Microbial sensor
for on-line determination of microbial population in fermenter, 45
Microbiosensor
for determination of choline and acetylcholine, development of, 37
Microcalorimetric sensors
methane and butane concentrations in mixture with air determined by, and neutral networks, 147
Microelectrochemical transistors
Ir oxide-based, for pH sensing, 225
Microprobe
temperature-controlled Kelvin, 175
Molecular system
sensors and actuators in perspective, 41

Odours
transformed cluster analysis; approach to identification of, using integrated gas-sensor array, 103
Odour sensor
novel, coated with lipid membrane, 15
Optical-fibre pH sensor, 29
Optical-fibre sensor
polarimetric, for biochemical measurements, 205
Oxygen sensors
operation of leaky zirconia pump-gauge, in a.c. mode
experimental results, 199
theoretical analysis, 195
proportional air–fuel ratio zirconia, 83

pH sensing
Ir oxide-based microelectrochemical transistors for, 225
pH sensor
optical-fibre, 29
Platinum
calorimetric combustible gas detector employing Pt film heaters, 91
Polyaniline material
research into normal temperature gas-sensitive characteristics of, 11
Pump-gauge oxygen sensors
operation of leaky zirconia, in a.c. mode
experimental results, 199
theoretical analysis, 195

Regression analysis
extended disjoint principal-components, of SAW vapor sensor-array responses, 123
Ruthenium
gas sensing using Langmuir–Blodgett films of Ru porphyrin, 111

Sensing mechanism
characteristics and, of SO_x sensor using stabilized zirconia and metal sulphate, 77
Sensor-array responses
extended disjoint principal-components regression analysis of SAW vapor, 123
Silicon
effect of total hydrogen content in Si nitride sensitive film on performance of ISFET, 23
Solvent vapours
tetraazacyclophanes as host molecules for; mass-sensitive detection and force-field calculations, 169
Structure
of ultramicro $ZnSnO_3$ powder, 5
Sulfur oxides
characteristics and sensing mechanism of SO_x sensor using stabilized zirconia and metal sulphate, 77
Surface acoustic wave
temperature effect and chemical response of SAW single-delay-line chemosensors, 115
temperature and humidity sensor with high resolution, 53
vapor sensor-array responses, extended disjoint principal-components regression analysis of, 123
Surface plasmon interrogation
fiber-optic sensor based on, 221
Suspended-gate field-effect transistors
simulation of lateral electrical field for analysis of threshold voltage instabilities of, 231

Temperature effect
and chemical response of SAW single-delay-line chemosensors, 115

Temperature sensor
SAW, with high resolution, 53
Tetraazacyclophanes
as host molecules for solvent vapours; mass-sensitive detection and force-field calculations, 169
Threshold voltage instabilities
simulation of lateral electrical field for analysis of, of suspended-gate field-effect transistors, 231
Tin
preparation, structure and gas-sensing properties of ultra-micro $ZnSnO_3$ powder, 5
Tin dioxide
mechanism of interaction between CO and SnO_2 surface; role of water vapour, 71
Tungsten
effect of water on hydrogen-sensitive W oxide films, 161

Vacancy donors
and electrical properties of Bi Fe molybdate pellets, 95
Water
effect of, on hydrogen-sensitive W oxide films, 161
Water vapour
mechanism of interaction between CO and SnO_2 surface; role of, 71

Zinc
fabrication of thin-film CuO/ZnO heterojunction and its humidity-sensing properties, 135
preparation, structure and gas-sensing properties of ultra-micro $ZnSnO_3$ powder, 5
Zirconia
characteristics and sensing mechanism of SO_x sensor using, and metal sulphate, 77
operation of leaky, pump-gauge oxygen sensors in a.c. mode
experimental results, 199
theoretical analysis, 195
proportional air–fuel ratio, oxygen sensor, 83
